Creating neighbourhoods for the future

Live Wirral Wardens

Protecting neighbourhoods for the future

Live Wirral Wardens operate in Birkenhead, Rock Ferry, Tranmere and Wallasey and consist of **Neighbourhood Wardens** and **Environmental Wardens**. The two teams have differing objectives but work in unison to improve the areas they work in.

Neighbourhood Wardens

Neighbourhood Wardens work closely with the community and other agencies resolving issues and problems raised by local residents.

The team are very focused on Community Engagement and encourage the interaction and participation of the community at every opportunity. The team has set up several community groups in areas where community consultation has shown problems with the environment and Anti-Social Behaviour. Working with these groups and partner agencies the Neighbourhood Wardens run projects and initiatives to help improve the environment, raise community spirit, provide diversionary activities and assist residents living through change.

Environmental Wardens

Environmental Wardens keep areas clean and tidy through removal of fly tipping, boarding up void properties, litter picks, graffiti removal, maintaining green spaces and special environmental works.

The team patrols areas of regeneration on a daily basis removing high numbers of fly tipping for example between October and December 2007, the team removed 26 tons of waste that included over 380 individual incidents of fly tipping in just the Rock Ferry and Tranmere areas alone. The Environmental Wardens also work with the community as much as possible encouraging them to participate in Community Environmental Events and keeping their Neighbourhoods clean and tidy.
